## This Month's Puzzle

A ship is docked in the harbour. Over the side hangs a rope ladder with rungs a foot apart. The tide rises at a rate of 9 inches per hour. At the end of six hours, how much of the rope ladder will still remain above water, assuming that 9 feet were above the water when the tide began to rise?

## Joke of the Month

The manager of a large office noticed a new man one day and told him to come into his office. "What's your name?" he asked the new guy. "John," the new guy replied. The manager scowled, "Look... I don't know what kind of a namby-pamby place you worked before, but I don't call anyone by their first name. It breeds familiarity and that leads to a breakdown in authority. I refer to my employees by their last name only ... Smith, Jones, Baker ... That's all. I am to be referred to only as Mr. Robertson. Now that we got that straight, what is your last name?"

The new guy sighed, "Darling. My name is John Darling."  
"Okay John, the next thing I want to tell you is . . ."

*Heard a good one lately? Send it off to the Editor and your joke could be published in next month's bulletin.*
